

Our Story

"TLC Kids Therapy began as a labor of love to help children with special needs. I believe every child has a voice, if only we listen, & that behavior is a type of communication, if only we can figure out what they are trying to tell us. Every child can move, so we must figure out how to help them. Every child deserves to be loved, cherished, & to have the chance to live their best life. I believe families of children with special needs are also special: they face extra challenges & need extra support. Our mission at TLC is to be a blessing to these children & their families. I believe that miracles can happen!"

Robbie Dunn, OTR

At TLC, our therapists are trained to see each child as a whole & unique person in order to best meet their individual needs.

Why TLC Kids Therapy?

Play-based Therapy:

Our staff works hard to ensure the play-based method of therapy we use is engaging, interactive and welcoming to every one of our little patients.

Teamwork:

We believe in creating a welcoming and accepting environment by working together with the families to help each child reach their goals.

Self Reliance:

Our goal is to help children work through any limitations in their day-to-day routines and improve how they interact with their environment.
